

FINISH CLEANER 61

Application Areas

REDCOL Finish Cleaner 61 is useful for practically every kind of surface, such as glass, plastic, lacquer, linoleum and metal. Current tests prove that the cleaner can even be regularly used on sensitive acrylic surfaces such as the attractive 3D acrylic edgings and the Kristall acrylic glass fronts. Solid surface boards, aluminium surfaces, coated particle boards as well as mirror and glass surfaces can likewise be cleaned without any problems. For acrylic surfaces, however, you should always spray the cleaner onto a cloth first and not directly onto the surface. The highly effective antistatic formula helps repel dust and dirt, leaving behind a shiny resistant surface that provides long-term protection against new dirt accumulations.

Product Characteristics

- removes greasy and silicone-like soiling
- cleans without streaks
- ideal for cleaning after final assembly
- biodegradable
- bottle is refillable

Processing Information

In case of heavy soiling, spray Finish Cleaner 61 directly onto the surface and let it react.

For light and normal soiling as well as with acrylic surfaces under tension apply the cleaner to a clean microfibre cloth and wipe and clean the surfaces evenly.

Hot surfaces are the only no-go area for this versatile cleaner!
